PROFESSIONAL SUMMARY

Results-driven MERN Stack Developer with hands-on experience in designing, developing, and deploying scalable full-stack web applications using React.js, Node.js, Express.js, MongoDB, and REST APIs. Skilled in JWT Authentication, Role-Based Access Control (RBAC), frontend development, backend integration, workflow automation, and responsive UI design. Strong understanding of scalable backend systems, software engineering principles, and performance optimization with practical experience through internships, hackathons, and real-world projects.

EDUCATION

Parul University, Vadodara

2022 – 2026

Bachelor of Technology in Computer Science Engineering
(7.21 CGPA)

TECHNICAL SKILLS

Languages	JavaScript (ES6+), C++, SQL
Frontend	React.js, Redux, HTML5, CSS3, Tailwind CSS, Bootstrap
Backend	Node.js, Express.js, REST APIs, JWT Authentication
Database	MongoDB, MySQL, Redis
Tools & Platforms	Git, GitHub, Docker, CI/CD (GitHub Actions), VS Code, Postman, Vercel, Railway, Netlify
Libraries & APIs	Axios, JSON, API Integration, RESTful Services
Core Concepts	OOPs, Data Structures & Algorithms, CRUD Operations, Responsive Design, RBAC

EXPERIENCE

Excelsior Technologies

Feb 2026 – Present

MERN Stack Developer Intern

Onsite

- Developing scalable full-stack applications using MongoDB, Express.js, React.js, and Node.js.
- Building and integrating REST APIs for seamless frontend-backend communication.
- Improving application responsiveness, backend performance, and scalability.

Warals Technology Pvt. Ltd.

Dec 2025 – Jan 2026

React JS Intern

Remote

- Developed reusable React components and optimized frontend architecture.
- Improved state management and responsive user interfaces.

Sparks to Ideas

May 2025 – June 2025

Web Designer Intern

Remote

- Built responsive web pages using HTML, CSS, and JavaScript.
- Improved UI consistency and cross-browser compatibility.

PROJECTS

UP Student AI Copilot (Flagship)

Live Demo — [GitHub](#)

- Developed a full-stack AI-powered productivity platform using React.js, Node.js, Express.js, and MongoDB.
- Implemented secure JWT Authentication and Role-Based Access Control (RBAC) for protected user access.
- Built intelligent dashboards, task management modules, and productivity tracking features.
- Designed scalable REST APIs and optimized frontend-backend communication for better performance.
- Delivered a responsive, modern user interface with seamless cross-device compatibility.

Employee Leave Management System

Live Demo — [GitHub](#)

- Built a complete MERN-based leave management platform with employee and admin dashboards.
- Developed role-based leave approval workflows, authentication, and leave history management.
- Automated leave request processing, reducing manual administrative effort significantly.
- Designed responsive dashboards and integrated REST APIs for efficient data management.
- Improved overall workflow efficiency through streamlined approval and tracking features.

School Management System

[GitHub](#)

- Developed a web-based school management platform for managing students, teachers, attendance, timetables, and academic records.
- Built responsive dashboards with secure authentication and role-based access.
- Designed REST APIs for efficient management of student information and administrative workflows.
- Improved usability through responsive UI, optimized navigation, and structured data management.
- Implemented scalable CRUD operations for academic and administrative modules.

CERTIFICATIONS

- React js Certification – STP Computer Education
- Power BI Certification – Data Visualization & Dashboards
- SAP Emerging Technologies – Code Unnati Program

HACKATHONS & ACHIEVEMENTS

- Navonmesh 2.0 Hackathon – Top 30 Teams
- August Code Hackathon – Top 15 Teams
- PU Code Hackathon 2.0 – National Level Participant
